

Optimal and Sustainable: Renewable Energy Revamp

U.S. Energy Potential Maps

Potential for geothermal energy around the United States

- 1. Huntsville, Alabama
- 2. Harrisburg, Pennsylvania
- 3. Lubbock, Texas

- 4. Aspen, Colorado
- 5. Bismarck, North Dakota
- 6. Tucson, Arizona

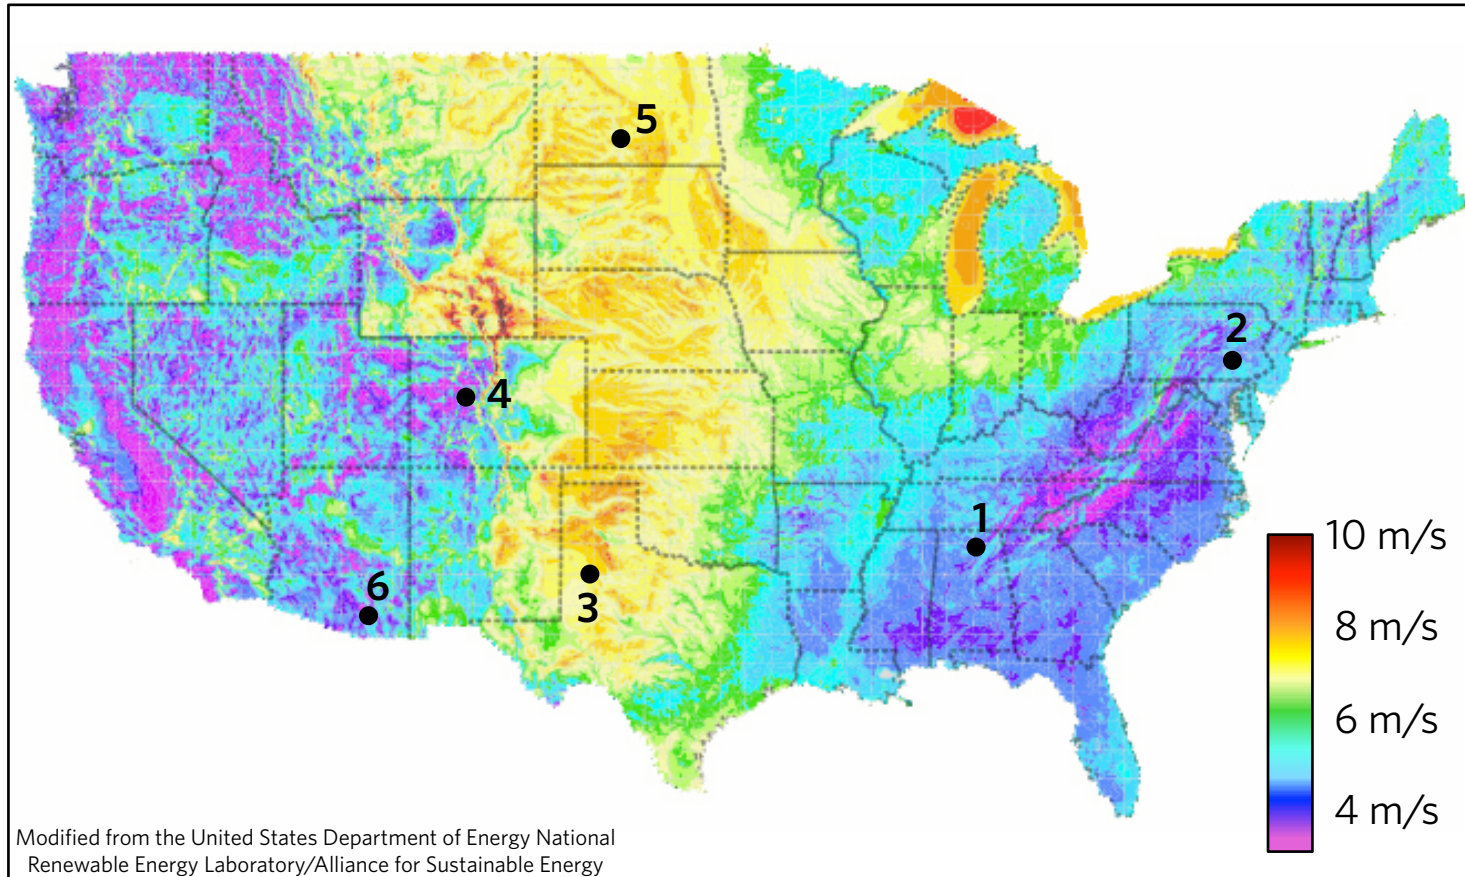

Optimal and Sustainable: Renewable Energy Revamp

U.S. Energy Potential Maps

Wind speed 80 meters above the ground
(Wind speeds of 6.5 m/s or greater are best for using wind turbines to generate electricity)

- 1. Huntsville, Alabama
- 2. Harrisburg, Pennsylvania
- 3. Lubbock, Texas
- 4. Aspen, Colorado
- 5. Bismarck, North Dakota
- 6. Tucson, Arizona

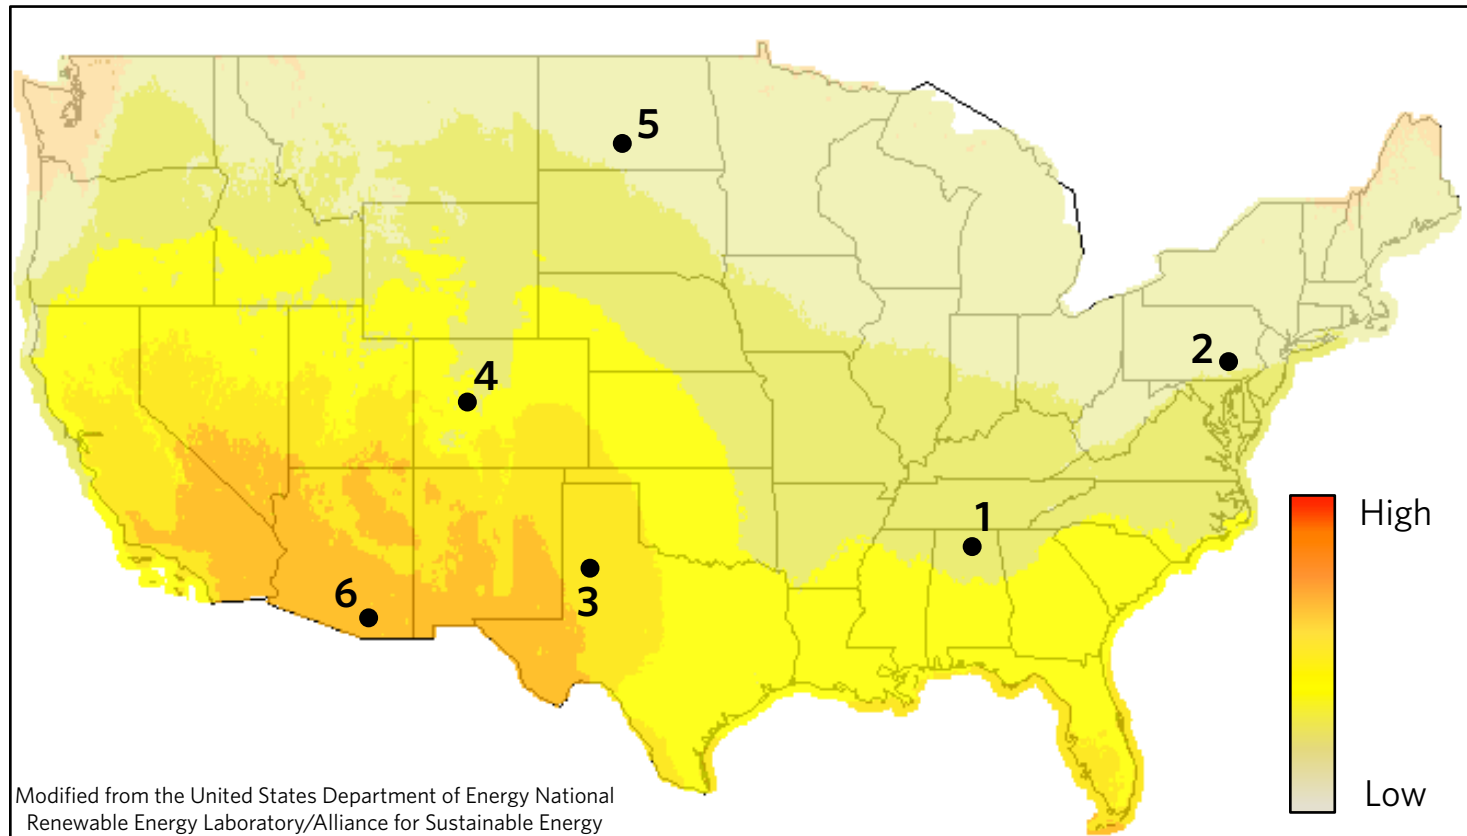

Optimal and Sustainable: Renewable Energy Revamp

U.S. Energy Potential Maps

Average amount of sunlight around the United States

Modified from the United States Department of Energy National Renewable Energy Laboratory/Alliance for Sustainable Energy

- 1. Huntsville, Alabama
- 2. Harrisburg, Pennsylvania
- 3. Lubbock, Texas
- 4. Aspen, Colorado
- 5. Bismarck, North Dakota
- 6. Tucson, Arizona
