

Reflect on your trip:

1. Were you able to travel to all required destinations in the allotted time period? If so, did you find it easy to minimize your carbon emissions? What are some of the strategies you used to plan your trip?

2. Is there a relationship between your carbon emissions and the speed with which you traveled?

3. Watch the Global Air Traffic clip again. What regions have the most air traffic? In what regions is there little to no air traffic? What do you think are the reasons for this?

Name: _____ Date: _____

Group members: _____

4. Do you think the carbon dioxide emitted from airplanes while they are flying stays in the location where it is emitted? Why or why not?

5. How does your total carbon emissions compare to other groups? What accounts for the differences?

Name: _____ Date: _____

Group members: _____
